EDITOR  
*British Medical Journal*

SHIRLEY McGEALEY  
(*Technical Editor*)

*Gut* publishes original papers and reviews concerned with practice and research in the field of gastroenterology. The field is that of alimentary, hepatic, or pancreatic disease, and papers may cover the medical, surgical, radiological, or historical aspects. They may also deal with the basic sciences concerned with the alimentary tract, including experimental work. A case report will be accepted only if it deals with a clinical problem which has been studied in detail and the resulting data provide material for further research. Letters dealing with matters arising from articles published in *Gut*, or with topics of general professional interest are encouraged, but the correspondence column should not be used for publication of original data.

**COMMUNICATIONS** Two copies of papers and figures should be addressed to the Editor, *Gut*, BMA House, Tavistock Square, London WC1H 9JR. Papers are accepted only on the written understanding, signed by all authors, that they are not published elsewhere without previous sanction of the Editorial Committee, and that all authors agree to publication in *Gut*. Manuscripts should follow the Vancouver conventions (see *Br Med J* 1979; 1: 532-5. *Gut* 1979; 20: 651-2). They should be in double-spaced typewriting on one side of the paper only. On the paper the name of the author should appear with initials (or distinguishing first name) only, and the name and address of the hospital or laboratory where the work was performed. A short summary should be provided at the beginning of the paper.

**ACKNOWLEDGEMENT OF MANUSCRIPTS** Manuscripts will not be acknowledged unless a stamped addressed postcard or international reply coupon is enclosed.

**ILLUSTRATIONS** *Photographs* Unmounted photographs on glossy paper should be provided. *Diagrams* These will usually be reduced to 2¾ in wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with Figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as Figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

**ETHICS** Ethical considerations will be taken into account in the assessment of papers (see the Medical Research Council's publications on the ethics of human experimentation, and the World Medical Association's code of ethics, known as the Declaration of Helsinki (see *Br Med J* 1964; 2: 177)).

**SI UNITS** All measurements except blood pressure are expressed in SI units. In the text they should be followed

by traditional units in parentheses. In tables, and illustrations values are given in SI units, but a conversion factor must be supplied. For general guidance on the International System of Units and some useful conversion factors, see *The SI for the Health Professions* (WHO, 1977). **NB: Such conversion is the responsibility of the author.**

**REFERENCES** These follow the Vancouver system - that is, references numbered consecutively in the text and listed numerically with titles abbreviated in the style of *Index Medicus, Standard journal article* - (list all authors when six or less; when seven or more, list first three and add *et al*): James A, Joyce B, Harvey T. Effect of long-term cimetidine. *Gut* 1979; 20: 123-4. **NB: Accurate punctuation is essential.**

**CORRECTIONS** other than printers' errors may be charged to the author.

**REPRINTS** Twenty five reprints will be supplied free of charge. Further reprints will be available on payment of the necessary costs; the number of reprints required should be sent to the Publishing Manager on the form provided with the proof.

**NOTICE TO ADVERTISERS** Application for advertisement space and for rates should be addressed to the Advertisement Manager, *Gut*, BMA House, Tavistock Square, London WC1H 9JR.

**NOTICE TO SUBSCRIBERS** *Gut* is published monthly. The annual subscription rates are £77 inland and £89 overseas (including the USA). Orders should be sent to the Subscription Manager, *Gut*, BMA House, Tavistock Square, London WC1H 9JR. Orders can also be placed with any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can also be sent to: *British Medical Journal*, Box 560B, Kennebunkport, Maine 04046. All enquiries, however, must be addressed to the Publisher in London.) All enquiries regarding air mail rates and single copies already published should be addressed to the Publisher in London.

**COPYRIGHT** © 1986 *Gut*. This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any relaxations permitted under national copyright laws, no part of the publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is not, however, required to copy abstracts of papers or articles on condition that a full reference to the source is shown. Multiple copying of the contents of the publication without permission is always illegal.

## **Inflammatory Bowel Disease**

Some international data and reflections

**F. T. de Dombal, J. Myren, I. A. D. Bouchier, and G. Watkinson**

This book represents the first serious attempt to establish universally acceptable nosologic and diagnostic criteria for inflammatory bowel disease. It contains much original material based on the detailed analysis of data gathered from just under 3000 cases from 35 centres in 20 countries. It includes up-to-date information on epidemiology, aetiology, pathogenesis, diagnosis, and treatment from well-known authorities.

**Contents:** Inflammatory bowel disease—a historical perspective; Pathogenesis and aetiology of inflammatory bowel disease; The epidemiology of inflammatory bowel disease; Diagnosis of patients with inflammatory bowel disease—the value of clinical features; The radiology of inflammatory bowel disease; The role of rectal biopsy in inflammatory bowel disease; The protean complications of inflammatory bowel disease; Cancer and inflammatory bowel disease—changing perspectives; Measuring and quantifying the status of patients with inflammatory bowel disease; A system for the anatomical coding of Crohn's disease involvement; The OMGE multinational inflammatory bowel disease survey: a report on 2657 cases; Inflammatory bowel disease in various countries; The medical treatment of acute attacks of inflammatory bowel disease; The medical management of long-standing inflammatory bowel disease; Nutritional support of patients with inflammatory bowel disease; Indications for surgery in Crohn's disease; Currently used surgical procedures for inflammatory bowel disease.
