

in the treatment of
peptic ulcer

ROTER

has particular
advantages

ROTER achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

ROTER in many cases obviates the need for hospitalization or surgical intervention.

ROTER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTER has no known side effects.

ROTER requires no supplementary medication such as sedatives or anti-spasmodics.

ROTER shows a saving in cost when compared with conventional methods of treatment.

'ALUHYDE'

for prompt, safe symptomatic medication in
hyperchlorhydria and peptic ulcer

'ALUHYDE' tablets present a new combination with these advantages...

'ALUHYDE' effects safe, reliable, non-systemic neutralization by means of two of the most preferred modern antacid adsorbents...

'ALUHYDE' permits of quick mental sedative-effect by its inclusion of a barbiturate recognized for minimal cumulative potential...

'ALUHYDE' provides antispasmodic action through its content of an agent long known for its favourable influence against hypermotility...

Formula—

Each tablet: Dried Aluminium Hydroxide Gel B.P.C.	-	3.75 gr.
Magnesium trisilicate B.P.	-	3.75 gr.
Quinalbarbitone sodium B.P.	-	0.50 gr.
Tinct. Belladonnæ B.P.	-	3 m.

Packings—Regular packs of 50 ; bottles of 500 (dispensing)

*Samples available on personally signed request
of qualified physicians only*

People in every walk of life, subjected to everyday stresses and strains, may suffer from gastric disorders. And if mental stress has not actually caused the condition, it will almost certainly aggravate it. 'Stelabid' is specific for such disorders. It reduces gastric secretion and, by inhibiting motility and spasm, relieves physical pain; and it protects against nausea and vomiting. Furthermore, 'Stelabid' combats the underlying cause by effectively relieving the anxiety and tension that provoke the condition.

Each 'Stelabid' tablet contains 1 mg. 'Stelazine' (brand of trifluoperazine) and 5 mg. 'Tyrimide' (brand of isopropamide). In containers of 30 and 250.

Literature containing prescribing information is available on request.

'Stelabid' gives complete symptomatic relief, night and day

LONDON HOSPITAL CATGUT

new catalogue with simplified product coding now available

The new coding system is clear and easy to follow. All codes now bear where possible a direct relationship with the product and are planned to simplify stock keeping and ordering. The catalogue shows you

The new comprehensive range of LHC eyeless needles with non-absorbable sutures.

An increased range of eyeless needles with catgut.

Non-absorbable materials in stock lengths of varying quantities.

New braided stainless steel suture wires.

An increased range of ligatures.

Emergency sutures.

B.P. (1963) and B.P.C. (1963) Summary of Monographs.

Keep your
peptic ulcer
patient at
work with
NACTON
REGD.

Nacton halves gastric acid secretion:
lessens gastric spasm without
side-effects in therapeutic doses

During a 3-year follow-up trial* with Nacton when the patients' food was entirely of their own choosing:

- Antacids were found unnecessary
 - Duodenal deformity was reduced in 42% of the patients
 - Average loss of time from work was reduced from 4 weeks to only half a day per year.
- *Brit. med. J., (1961), i, 1575

NACTON (poldine methymethosulphate) is a product of British research at
BEECHAM RESEARCH LABORATORIES

**20 YEARS
OF SUCCESS IN
ULCERATIVE COLITIS
WITH**

SALAZOPYRIN

Salazopyrin was first used in Sweden in the early 1940's. Since then it has become the universally recognised treatment for ulcerative colitis. Its action is believed to depend on its specific affinity for connective tissues. Remission, or considerable improvement, has been seen in 70-80% of patients treated with Salazopyrin.

Positive Results

In patients with active ulcerative colitis, Salazopyrin achieves positive results—

- * number of stools decreases
- * abdominal cramp disappears
- * fever subsides
- * appetite improves
- * rectal mucosa heals rapidly

NEW SALAZOPYRIN EN-tabs...

are better tolerated because of their special enteric coating and convenient, easily-swallowed shape. They dissolve easily in the small intestine, so reducing to a minimum gastric upset or nausea, which have been noted in some patients.

SALAZOPYRIN (plain) in bottles of 100 and 500 tablets
SALAZOPYRIN EN-tabs in bottles of 100 tablets

Each tablet of Salazopyrin, coated or uncoated, contains 0.5G of Salicylazosulphapyridine/sulphasalazine.

the first
antacid
pastilles

SMOOTH, EFFECTIVE—REALLY DELICIOUS

NOW, for the very first time, you can prescribe smooth effective antacid *pastilles* that buffer gastric pH to the optimum physiological level and keep it there. Gastrils have no chalky 'antacid' taste—they really *are* delicious! Even your ulcer patients can forget the misery of antacid therapy with Gastrils—the more so because each Gastrils prescription is dispensed in equal quantities of mint and fruit flavours to relieve the monotony of constant antacid treatment. Give your patients a smile in the face of an ulcer—prescribe Gastrils.

'Gastrils' is a registered trade mark of T. J. Smith & Nephew Ltd.

TWO FLAVOURS

Equal quantities of mint and fruit Gastrils are dispensed on every prescription. Each pastille contains 500 mg. co-dried gel of aluminium hydroxide and magnesium carbonate. Basic N.H.S. cost of 24 Gastrils from the dispensing pack is 2/6½d. Subject to Purchase Tax.

Gastrils are indicated in hyperacidity, peptic ulcer, gastritis, heartburn, oesophagitis and hiatus hernia.

WELWYN GARDEN CITY · HERTFORDSHIRE · ENGLAND

don't use Merbentyl to inhibit gastric secretion

because

Merbentyl is not an antisecretory drug. Do use it to control gastrointestinal spasm because here Merbentyl is a remarkably effective antispasmodic. Moreover, Merbentyl is so selective that its use is rarely followed by side effects commonly seen with other drugs used for this purpose. It can even be administered to patients with chronic simple glaucoma or prostatic hypertrophy.

Merbentyl (dicyclomine hydrochloride B.P.C.) was first described in 1947, and has been widely used clinically to control gastrointestinal spasm and hypermotility in many countries for over 12 years. It acts both on the neuroreceptor sites innervated by post-ganglionic parasympathetic fibres, and directly on smooth muscle tissue.

Indications

- 1 Primary functional disorders of the gastro-intestinal tract: spastic colon, pylorospasm, post-cholecystectomy syndrome.
- 2 Adjunctive therapy in organic disorders, e.g. ulcerative colitis, diverticulitis.
- 3 Infant colic (here the drug is regarded as specific therapy).

Low NHS. cost An average week's treatment—2/8d.

Merbentyl tablets each tablet contains 10mg. dicyclomine hydrochloride B.P.C. Recommended adult dosage, 2 t.d.s.

Also available with phenobarbitone and as Merbentyl Syrup.

Full clinical information available on request.

Merrell-National (Laboratories) Limited, 20 Savile Row, London, W.1.

INSTANT PROTEIN

Yes, AMINOSOL FRUCTOSE ETHANOL really is 'instant' protein. Predigested, dialyzed and combined with fructose and ethanol as a caloric source, it is rapidly utilised for the restoration and maintenance of nitrogen equilibrium in the seriously debilitated patient.

Available in 500 ml. and 1,000 ml. infusion bottles
AMINOSOL F.E. contains 4.25 G. Nitrogen
and 875 calories per litre.

Hemochromatosis and Hemosiderosis

By **RICHARD A. MacDONALD, M.D.**
*Harvard Medical School
 Boston, Massachusetts*

Hemochromatosis has been an intriguing but puzzling condition for over one hundred years. *A number of subjects must be reviewed in an attempt to understand it*—normal iron absorption and metabolism, iron absorption and metabolism in anemias and in hemochromatosis, effects of iron on tissues, cirrhosis of the liver, heart disease and altered carbohydrate metabolism in cirrhosis. In discussing these and other relevant topics, Doctor MacDonald has drawn on material from the literature, extensive personal experience, and personal visits and collaborative studies with workers in related fields in Africa, Asia, Europe, the Middle East, and the United States.

BRITISH MEDICAL ASSOCIATION PUBLICATIONS

ONE of the primary objects of the British Medical Association is the promotion of medical and allied sciences and each year a considerable portion of its income is spent in publishing a wide range of general and specialist journals.

BRITISH MEDICAL JOURNAL

A comprehensive general medical journal. Essential for every medical man or student who wishes to keep informed of research in medical science, of trends in clinical medicine and of professional activities.

Weekly. Annual Subscription, United Kingdom, Irish Republic, £9 9s.; Abroad, £5 5s. (\$15.00).

—Specialist Journals—

BRITISH JOURNAL OF OPHTHALMOLOGY

Designed for the clinician and research worker and includes original articles, case notes, information on new appliances, book reviews.

Monthly. Annual Subscription, Inland £6 6s.; Overseas £7 (\$20.00).

(Combined subscription for the two Ophthalmic Journals, Inland £9 9s.; Overseas £10 10s. (\$30.00)).

OPHTHALMIC LITERATURE

Abstracts of articles on the wide field of ophthalmology published throughout the world. Each volume contains some 5,000 abstracts—covering one year.

Annual Subscription, Inland £4 4s.; Overseas £4 15s. (\$13.50). (For combined subscription see above).

JOURNAL OF CLINICAL PATHOLOGY

Original and specially commissioned articles on each branch of pathology, with prominence given to its clinical application. Technical methods, notes on new or improved apparatus, book reviews.

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

BRITISH HEART JOURNAL

Original work on the heart and circulation—*anatomical, physiological and pathological.*

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

ARCHIVES OF DISEASE IN CHILDHOOD

Devoted to child health and disease, with emphasis on clinical paediatrics. Original articles by paediatricians and other specialists.

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

BRITISH JOURNAL OF PHARMACOLOGY AND CHEMOTHERAPY

Reports of original work in all branches of the subject, including experimental chemotherapy. Biochemical and pathological studies.

Annual Subscription (six issues), Inland £6 6s.; Overseas £7 (\$20.00).

JOURNAL OF NEUROLOGY, NEUROSURGERY AND PSYCHIATRY

Original articles on current research, throwing light on practice in neurology, neurosurgery and psychiatry.

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

ANNALS OF THE RHEUMATIC DISEASES

Original articles by authorities in the U.K., U.S.A. and elsewhere on every manifestation of the rheumatic diseases. Summaries in English, French and Spanish.

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

THORAX

Original work on the anatomy, physiology and pathology of the chest and heart. Descriptions of techniques and apparatus used in modern cardiac surgery.

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

GUT

Journal of the British Society of Gastroenterology. A new journal for physicians, surgeons, radiologists and pathologists, carrying authoritative articles on all aspects of gastroenterology.

Annual Subscription (six issues), Inland £4 4s.; Overseas £4 15s. (\$13.50).

BRITISH JOURNAL OF VENEREAL DISEASES

Designed to disseminate, exchange and increase knowledge among consultants, practitioners, research workers, teachers and others concerned with the problem of venereal diseases.

Quarterly. Annual Subscription, Inland £3 3s.; Overseas £3 10s. (\$10.00).

BRITISH JOURNAL OF INDUSTRIAL MEDICINE

Authoritative papers on all aspects of occupational medicine, e.g., the pneumoconioses, occupational cancers, industrial toxicology and psychology.

Quarterly. Annual Subscription, Inland £3 3s.; Overseas £3 10s. (\$10.00).

BRITISH JOURNAL OF PREVENTIVE AND SOCIAL MEDICINE

Original work in the field, the emphasis on epidemiological methods in medical research.

Quarterly. Annual Subscription, Inland £3 3s.; Overseas £3 10s. (\$10.00).

MEDICAL AND BIOLOGICAL ILLUSTRATION

Illustration and its application to the requirements of the medical and biological sciences.

Quarterly. Annual Subscription, Inland £3 3s.; Overseas £3 10s. (\$10.00).

—General—

ABSTRACTS OF WORLD MEDICINE

Critical abstracts of important articles appearing in medical periodicals in every part of the world. Accent on what is new.

Monthly. Annual Subscription, Inland and Overseas £6 6s. (\$18.00).

SECRETIN and **PANCREOZYMIN**

These preparations may be confidently used in the serum enzyme test and the duodenal aspiration test. Although solutions should be used almost immediately, unopened vials kept in a refrigerator will retain their activity for 2 years.

For the diagnosis of:

- Chronic pancreatitis
- Carcinoma of the head of the pancreas
- Steatorrhoea of pancreatic origin
- Obstruction of the biliary duct system
- Impaired gall-bladder function

SECRETIN is supplied in 10cc rubber-capped vials each containing 80—120 units. The potency is declared on each vial following biological assay

PANCREOZYMIN is supplied in 20cc rubber-capped vials each containing 100 units
