

**"90%  
satisfactory  
response  
obtained in  
ambulant  
patients"**

"The immediate clinical results were assessed after the first month's treatment (with Roter Tablets) . . . 81% of cases became symptom-free—70% of them during the first week and 30% during the second week; a further 9% were relieved of the majority of their symptoms. Thus there was a satisfactory response in 90% of cases . . . In 75% of cases the patients found they were able to take foods which they had avoided for years "

Extract from the **BRITISH MEDICAL JOURNAL** (1955) 2, 827

## **IMPROVED THERAPY FOR PEPTIC ULCER**

"In a series of 155 cases of peptic ulcer treated with . . . (Roter) tablets for three to six weeks, there was immediate relief of pain in 92% of cases and roentgenological healing of the ulcer in 81% . . . The special features of this medication are immediate and prolonged relief of pain, correction of gastric hyperacidity, absence of side reactions, effectiveness for ambulatory patients, and early healing of the ulcer in most cases."

Extract from the **AMERICAN JOURNAL OF GASTROENTEROLOGY** (1957) 28, 439

**"Immediate  
relief of  
pain in  
92%  
of cases"**

**TABLETS**

**FORMULA PER TABLET.** Magnesium Carbonate (400 mg.), Bismuth Subnitrate Roter (350 mg.), Sodium Bicarbonate (200 mg.), and Cortex Rhamni Frangulae (25 mg.).

**PACKINGS.** Tins of 40, 120, and dispensing sizes 360 and 720 (P.T. exempt.). Basic N.H.S. price : 1/- for 10 tablets.

# 'ALUHYDE'

for prompt, safe symptomatic medication in  
hyperchlorhydria and peptic ulcer

'ALUHYDE' tablets present a new combination with these advantages...

'ALUHYDE' effects safe, reliable, non-systemic neutralization by means of two of the most preferred modern antacid adsorbents...

'ALUHYDE' permits of quick mental sedative-effect by its inclusion of a barbiturate recognized for minimal cumulative potential...

'ALUHYDE' provides antispasmodic action through its content of an agent long known for its favourable influence against hypermotility...

## Formula—

Each tablet:	Dried Aluminium Hydroxide Gel. B.P.C.	-	3.75 gr.
	Magnesium trisilicate B.P.	-	3.75 gr.
	Quinalbarbitone sodium B.P.	-	0.50 gr.
	Tinct. Belladonnæ B.P.	-	3 m.

Packings—Regular packs of 50 ; bottles of 500 (dispensing)

**NEW**

a more convenient and economical  
presentation of hydrocortisone  
for ulcerative colitis

**EFCORTELAN SOLUTION**

TRADE MARK

Given as a nightly rectal drip, soluble hydrocortisone (Efcortelan) has been demonstrated to afford rapid alleviation of symptoms of ulcerative colitis in most patients. Symptomatic relief is accompanied by an improvement in the sigmoidoscopic findings and in the colonic mucosa.

The method of treatment is quite suitable for the patient to carry out himself provided the attack is not severe.

With soluble Efcortelan, hormonal side-effects are avoided. If further attacks occur they can usually be

reduced by another course of treatment.

Only one of the new Efcortelan Solution Tablets in the appropriate amount of normal saline (100-120 ml) is needed to prepare the retention enema. It is therefore the ideal presentation for home treatment.

**EFCORTELAN SOLUTION TABLETS**

*Foil strip of 7 tablets (one week's treatment). Each tablet contains 100 mg hydrocortisone (as water soluble sodium succinate).*

*Subsidiary Companies or Agents in most countries*

**GLAXO LABORATORIES LTD,  
GREENFORD, MIDDLESEX  
BYRon 3434**

... 'Streptotriad' is indicated for the rapid control of the acute attack and is likely to prevent the patient from becoming a carrier, either during the convalescent or chronic stage of the disease. 'Streptotriad' is often effective also in the treatment of the symptomless carrier.

**Presentations:** Tablets, and as granules sufficient to prepare 1½ fl. oz. of suspension. Each tablet or 3-6 ml. (approx. one teaspoonful) of the prepared suspension contains:

STREPTOMYCIN SULPHATE .....	65 mg.
SULPHATHIAZOLE .....	100 mg.
SULPHADIAZINE .....	100 mg.
SULPHAMERAZINE .....	65 mg.

an improved

antacid preparation

'ALMACARB' tablets are prepared from an aluminium hydroxide-magnesium carbonate co-dried gel manufactured by an entirely new process (Brit. Pat. 812503). The result is a product of exceptional stability with a more rapid and prolonged acid-neutralising action than that of dried aluminium hydroxide gel, either alone or in mechanical admixture with magnesium carbonate.

'ALMACARB' tablets are unique because there is no loss of neutralising action either on processing or tableting.

'ALMACARB' tablets sucked at regular intervals will ensure effective control of gastric acidity. Used in this way they are more convenient than liquid antacids.

#### Dosage

One tablet to be chewed as an initial dose and thereafter one tablet to be sucked slowly at regular intervals.

#### Basic N.H.S. Prices

Individually foil-wrapped tablets.

# NULACIN "has revolutionized the treatment of duodenal ulcer"

"This new method of the administration of antacids (Nulacin) has revolutionized the treatment of duodenal ulcer . . . milk drip is no longer part of our therapeutic stock in trade."

PROC. ROY. SOC. MED., December, 1958, **51**, 1063

NULACIN tablets, when allowed to dissolve slowly in the mouth, provide intragastric milk-alkali drip therapy safely and effectively for both the bed-ridden and ambulant patient. They may be relied on to provide a treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity.

The safety and effectiveness of Nulacin therapy has been proven by "in vivo" clinical work carried out in many countries. References to this work include:—

## freedom from pain

In peptic ulcer, freedom from acid means freedom from pain. With single, intermittent doses of antacids, peaks of acidity and bouts of pain are inevitable.

But when Prodexin tablets are sucked, continuous flow and efficient buffering give not merely relief, but *constant protection* from acid pain and a safe level of acidity to encourage the ulcer to heal.

# Prodexin

## Two I.C.I. Medical Films on Gastro-enterology

OVER a number of years I.C.I. have established a comprehensive library of 16 mm. films covering a wide range of medical subjects. Made in collaboration with leading authorities, these films are available, free of charge, to interested borrowers. Two subjects of special interest in the field of gastro-enterology are "GASTRIC SECRETION", which demonstrates the factors responsible for the secretion of the gastric juice, and "PANCREATIC SECRETION" which describes the

chief mechanisms concerned in the stimulation of pancreatic secretion by a meal.

Both films were made in collaboration with the Department of Physiology, University of Liverpool, and are in colour.

For further details and particulars of how to borrow these, and other I.C.I. medical films, please write to the I.C.I. Film Library, Imperial Chemical House, Millbank, London, S.W.1.

# ASPIRIN IS SAFER WHEN IT IS SOLUBLE

*Soluble aspirin is safer  
when it is stable*

N.H.S. Basic Price 1 2/6 for 500 tablets in foils.

SOLPRIN provides soluble aspirin in its most stable form and dissolves rapidly in water to form a solution of calcium acetylsalicylate.

SOLPRIN is easy to take and palatable. It has proved rapid and reliable in its analgesic effect and is extremely well tolerated, even in prolonged and massive dosage.

SOLPRIN is not advertised to the public and is available only on prescription. Clinical samples and literature will be supplied on request.

... unless an adequate supply of pancreatic enzymes is available to complete digestion.

Pancrex V is the most effective preparation for replacing pancreatic secretion in the gut. It is indicated in cystic fibrosis of the pancreas, chronic pancreatitis, pancreatectomy, post-cholecystectomy and in all digestive disorders where a relative deficiency of pancreatic enzymes is a contributory factor.

Pancrex V is activated, whole dried pancreas having a tryptic activity approximately equal to 5 times that of Pancreatin B. P.

## **EMERGENCIES IN GENERAL PRACTICE**

This book comprises 57 specially commissioned articles on medical emergencies which appeared originally in the *British Medical Journal*.

Contents include haemorrhage and thrombosis, cardio-respiratory crises, anaesthesia and hazards of therapy, acute abdominal cases, obstetrics, fits and coma, electrocution, burns and gassing, poisoning, acute psychiatric states, and special and minor surgery.

Invaluable to all doctors everywhere.

470 pages, cloth bound with full index. 25s. net (by post—inland and overseas 26s. 9d.).

---

## **CLINICAL PATHOLOGY IN GENERAL PRACTICE**

This handbook on clinical pathology meets the needs of the general practitioner, the houseman, and the senior student. It contains thirty-nine articles comprising a series specially written for the *British Medical Journal*. Each article has been revised and brought up-to-date by its author. The book gives authoritative information on available laboratory facilities; reliable tests and which to use; techniques for collecting and preserving specimens; interpretation of results and significance of abnormal findings.

321 pages. Price 21s. (by post—inland and overseas 22s. 3d.).

---

## **REFRESHER COURSE FOR GENERAL PRACTITIONERS**

*Third Collection—with  
Classified Contents List  
to volumes 1, 2 and 3*

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable textbooks.

25s. (by post—inland and overseas 26s. 9d.).

---

## **"ANY QUESTIONS?"**

*Third Series—with  
Cumulative Index*

These pocket-size volumes each contain some 200 questions and expert answers from the "Any Questions?" pages of the *British Medical Journal*. Each answer has been chosen for its practical value to doctors in their day-to-day work. Many deal with subjects not covered in the standard textbooks.

The Third volume has a cumulative index to all the answers appearing in the three books in the series.

7s. 6d. (by post 8s. 3d.).

# PEPTIC ULCERATION

## A Symposium for Surgeons

BY CHARLES WELLS, M.B., F.R.C.S., and JAMES KYLE, M.Ch., F.R.C.S.(Eng.), F.R.C.S.I.

272 pages

69 illustrations

42s.

"This symposium presents in considerable detail recently acquired knowledge and changes in practice within the more lightly sketched framework of what is generally agreed concerning gastric and duodenal ulceration. No attempt has been made to describe in detail techniques which can only be mastered in the operating theatre but space is devoted to methods of dealing with unexpected difficulties which may arise in the course of everyday procedures. Little is said about routine diagnosis and such like but exceptions from the general pattern are discussed at some length. By contrast, aetiological factors and the post-gastrectomy syndromes are described very fully."—*Extract from Preface.*
