**EDITOR**  
*British Medical Journal*

**SHIRLEY McGEALEY**  
(*Technical Editor*)

*Gut* publishes original papers and reviews concerned with practice and research in gastroenterology. The field is that of basic science and physiology pertaining to the alimentary tract, the liver and pancreas and that of alimentary, hepatic, biliary or pancreatic disease. Papers may deal with medical, surgical, or epidemiological aspects or with imaging. A case report will be accepted only if it deals with a clinical problem which has been studied in detail and the resulting data provide material for further research. Letters dealing with matters arising from articles published in *Gut*, or with topics of general professional interest are encouraged, but the correspondence column should not be used for publication of original data.

**COMMUNICATIONS** Two copies of the manuscript and figures should be addressed to the Editor, *Gut*, BMA House, Tavistock Square, London WC1H 9JR, UK. Manuscripts should follow the Vancouver conventions (see *Br Med J* 1979; 1: 532-5. *Gut* 1979; 20: 651-2). They should be in double-spaced typewriting on one side of the paper only. On the title page the name of the author should appear with initials (or distinguishing first name) only, and the name and address of the hospital or laboratory where the work was performed. A 200 word summary must head the paper. Excessive use of abbreviations is discouraged. Papers are accepted only on the written understanding, signed by all authors, that the data have not been published elsewhere in whole or in part and that all the authors agree to publication in *Gut*; previous publication in abstract form must be disclosed in a footnote. Papers must not be published elsewhere without previous sanction of the Editorial Committee.

**ACKNOWLEDGEMENT OF MANUSCRIPTS** Manuscripts will not be acknowledged unless a stamped addressed postcard, or an international reply coupon is enclosed.

**ILLUSTRATIONS** *Photographs* Unmounted photographs on glossy paper should be provided. *Diagrams* These will usually be reduced to 2¾ in wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with Figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as Figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

**ETHICS** Ethical considerations will be taken into account in the assessment of papers (see the Medical Research Council's publications on the ethics of human experimentation, and the World Medical Association's code of ethics, known as the Declaration of Helsinki (see *Br Med J* 1964; 2: 177)).

**SI UNITS** All measurements except blood pressure are expressed in SI units. In the text they should be followed by

traditional units in parentheses. In tables, and illustrations values are given in SI units, but a conversion factor must be supplied. For general guidance on the International System of Units and some useful conversion factors, see *The SI for the Health Professions* (WHO, 1977). **NB: Such conversion is the responsibility of the author.**

**REFERENCES** These follow the Vancouver system - that is, references numbered consecutively in the text and listed numerically with titles abbreviated in the style of *Index Medicus, Standard journal article* - (list all authors when six or less; when seven or more, list first three and add *et al*): James A, Joyce B, Harvey T. Effect of long-term cimetidine. *Gut* 1979; 20: 123-4. **NB: Accurate punctuation is essential.**

**CORRECTIONS** other than printers' errors may be charged to the author.

**REPRINTS** Twenty five reprints will be supplied free of charge. Further reprints will be available on payment of the necessary costs; the number of reprints required should be sent to the Publishing Manager on the form provided with the proof.

**NOTICE TO ADVERTISERS** Application for advertisement space and for rates should be addressed to the Advertisement Manager, *Gut*, BMA House, Tavistock Square, London WC1H 9JR.

**NOTICE TO SUBSCRIBERS** *Gut* is published monthly. The annual subscription rates are £86 inland and £101 overseas (USA \$156.00). Reduced subscription of £48 available to trainees. Orders should be sent to the Subscription Manager, *Gut*, BMA House, Tavistock Square, London WC1H 9JR. Orders can also be placed with any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can also be sent to: *British Medical Journal*, Box 560B, Kennebunkport, Maine 04046. All enquiries, however, must be addressed to the Publisher in London.) All overseas copies of the journal are sent by accelerated surface post. If required, full air mail rates and enquiries for single copies already published should be addressed to the Publisher in London.

**COPYRIGHT** © 1988 *Gut*. This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any relaxations permitted under national copyright laws, no part of the publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is not, however, required to copy abstracts of papers or articles on condition that a full reference to the source is shown. Multiple copying of the contents of the publication without permission is always illegal.

Application to mail at second class postage rate is pending at Rahway NJ. Postmaster: send address changes to: *Gut*, c/o Mercury Airfreight International Ltd Inc, 2323 Randolph Avenue, Avenel, NJ 07001, USA.

ISSN 0017-5749

**Royal Postgraduate Medical School**

(University of London)

Royal Postgraduate Medical School  
**Diagnostic Liver and  
 Gastrointestinal pathology**

31 October – 4 November 1988

A week long course in the histopathology of the liver and luminal gastrointestinal tract, designed for pathologists who report such material professionally, and for gastroenterologists who are interested in the histological approach to diagnosis. The course will consist of lectures, demonstrations and practical microscopy sessions.

**All major problems will be covered, including:** The interpretation of gastric, small intestinal and colonic biopsies; neoplasms of the stomach and colon; coeliac disease; inflammatory bowel disease; endocrine tumours; lymphomas; the interpretation of liver biopsies; viral diseases; liver tumours; vascular and ductal lesions and their effects; chronic active liver diseases; toxic liver damage.

**Course teachers include:** Professor P. Isaacson, University College Medical School, London; Professor Julia Polak, Royal Postgraduate Medical School, London; Dr A. Price, Northwick Park Hospital, Harrow; Dr C. Foster, Royal Postgraduate Medical School, London; Professor N. A. Wright, Royal Postgraduate Medical School, London.

**Course organiser:** Professor N. A. Wright

**Course fee:** £275 including catering

*Application forms from:*

## Pyrogastrone Tablets

**carbenoxolone, aluminium hydroxide  
 and magnesium trisilicate in an alginate base**

For the treatment of oesophageal inflammation, erosions and ulcers due to hiatus hernia or other conditions causing gastro-oesophageal reflux, and for the relief of heartburn, flatulence and other symptoms associated with reflux oesophagitis. Each tablet contains Carbenoxolone Sodium BP 20mg, Dried Aluminium Hydroxide PhEur 240mg and Magnesium Trisilicate BP 60mg in a base containing Sodium Bicarbonate BP 210mg and Alginic Acid BPC 600mg. Each tablet contains 59.2mg (2.6mmol) Na.

**Adult dosage:** One tablet to be chewed immediately after meals, three times a day, and two to be chewed at bedtime.

**Elderly:** Not recommended for patients over 75 years of age; otherwise as for adults, but see "precautions".

**Children:** Not recommended

Cartons of 100 foil-packed tablets. Basic NHS cost of one day's treatment £1.22 (5 tablets). PL 0071/0138.

**Contra-indications:** Hypokalaemia, cardiac, renal or hepatic failure.

**Precautions:** Pyrogastrone should not be given to patients on digitalis therapy unless serum electrolyte levels are monitored weekly and measures taken to prevent the development of hypokalaemia. Special care should be exercised with patients predisposed to sodium and water retention, potassium loss and hypertension (e.g. the elderly and those with cardiac, renal or hepatic disease) since the carbenoxolone content of Pyrogastrone can induce similar changes. Regular monitoring of weight, blood pressure and clinical state, which should indicate the development of such effects is advisable for all patients.

If hypokalaemia occurs Pyrogastrone should be withdrawn and potassium loss should be corrected by the administration of supplements. Although animal studies have shown no hazard, there is inadequate evidence of the safety of carbenoxolone in human pregnancy. Pyrogastrone should therefore be avoided in those who are pregnant. Pyrogastrone is a registered trade mark. Made under licence from Biorex Laboratories Ltd., England. Brit. Pat. No. 1390683. Further information available from Winthrop Laboratories, Onslow Street, Guildford, Surrey GU1 4YS.

**Serono Seminars Announce  
A major one day International Symposium  
entitled:**

---

**THE EMERGENCY MANAGEMENT OF  
VARICEAL BLEEDING IN CIRRHOSIS**

---

**Date:** Monday 12 September 1988

**Venue:** Kings College Hospital, Medical School, Denmark Hill, London SE5

**Scientific Organisers**

Dr Roger Williams MD FRCP and Dr David Westaby MRCP.

**PROGRAMME**

09.15-10.00	Registration and coffee	
10.00-10.15	Introduction and Natural History	Dr R Williams (London)
<b>State of the Art Lecture</b>		
10.15-10.45	Techniques for haemodynamic assessment	Professor J Bosch (Barcelona)
<b>Clinical Trials of Pharmacological Therapy</b> <b>Chairman: Dr E Elias (Birmingham)</b>		
10.45-10.55	Vasopressin	Dr A Gimson (London)
10.55-11.05	Glypressin	Dr J Freeman (Derby)
11.05-11.15	Glypressin	Dr A Burroughs (London)
11.15-11.30	Somatostatin	Professor R Shields (Liverpool)
11.30-11.45	Somatostatin	Professor J Bosch (Barcelona)
11.45-12.00	Somatostatin	Dr A Burroughs (London)
12.00-12.30	General Discussion	
12.30- 1.00	Possible new approaches	Professor R Groszmann (Yale) <b>Astra Foundation Lecturer</b>
1.00- 2.00	<b>LUNCH</b> —King's College Hospital, Board Room	
<b>Balloon Tamponade and Sclerotherapy</b> <b>Chairman: Dr D Westaby (London)</b>		
2.00- 2.30	Blood volume depletion and repletion in portal hypertension	Professor R Groszmann (Yale) <b>Astra Foundation Lecturer</b>
2.30- 2.50	Balloon Tamponade	Professor A Johnson (Sheffield)
2.50- 3.10	Balloon Tamponade combined with injection sclerotherapy	Mr G Johnston (Belfast)
3.10- 3.30	Sclerotherapy as a single measure	Dr D Westaby (London)
3.30- 4.00	General discussion	
4.00- 4.30	<b>TEA</b>	
<b>Surgical Measures</b> <b>Chairman: Mr G Johnston (Belfast)</b>		
4.30- 4.50	Surgery as a primary measure for varices	Mr G Hamilton (London)
4.50- 5.20	Surgery for sclerotherapy complications/failure	Mr E R Howard (London)
<b>Chairman: Dr R Williams (London)</b>		
5.20- 6.00	Panel discussion and consensus	
6.00 onwards	Wine with buffet reception.	

*For further information and a Registration Form, please write to: Miss Hilary Cook, Serono Seminars, 2 Tewin Court, Welwyn Garden City, Herts AL7 1AU. Telephone: 0707 331972.*

## Correspondence

### Crohn's or poisoning?

SIR, — Recent work by Bjarnason *et al*<sup>1</sup> on blood and protein loss through small intestinal inflammation induced by non-steroidal anti-inflammatory drugs (NSAIDs) would appear to have potential medico-legal implications on the result of a celebrated murder trial which took place in 1859. A certain Dr Smethurst was found by jury trial to have murdered his wife by administration of an unknown poison. The Home Secretary, however, taking the advice of Sir Benjamin Brodie, Surgeon to St George's Hospital, granted Dr Smethurst a free pardon since there was not 'absolute and complete evidence of his guilt'.<sup>2</sup>

The necropsy findings have suggested subsequently that his wife had Crohn's disease.<sup>3</sup> In the small intestine 'nothing remarkable was observed until the lower end of the ileum was reached, when at about three feet from its termination in the caecum, the mucous membrane commenced to exhibit an inflammatory response'. In the caecum 'inflammation of the most acute and violent character was observed . . . the bare muscular coat was seen beneath. The muscular coat itself in the caecum was likewise infiltrated with this exudation . . . and there is no doubt that through this part of the intestine some transudation had occurred which had set up the peritonitis. No actual perforation was discoverable.'<sup>4</sup>

These findings could also be explained by severe NSAID induced ileitis. Salicylic acids are present in large concentrations in oil of wintergreen and administration of such medication, which was in common use at the time, may have resulted in the first reported case of non-steroidal drug induced intestinal inflammation in man.<sup>1,5</sup>

## Book review

**Surgery of the stomach, duodenum and small intestine.** By Scott and Sawyers. (Pp. 1000; illustrated; £125.) Oxford: Blackwell, 1987.

This book is certainly very readable but how it will fare in relation to other books on the subject is open to question. It contains a number of standard aspects such as the history of gastrointestinal surgery, some basic anatomy and physiology and it also includes chapters on endoscopy, radiology including angiography, as well as some good chapters on sonography, computed tomography and nuclear magnetic resonance. With these exceptions the remainder is an update of standard procedures, most of which are dealt with in other standard textbooks.

There are a number of illustrations, many of which are relatively unsophisticated for a book which costs £125. Though it has liberal references, some attention might have been paid to recommended reading. I found little that was new and nothing which was innovative. It should find its way into medical libraries though in my view it is unlikely to be purchased by many individual readers.

C G CLARK

### Books received

**Crime victims, needs, services and the voluntary sector.** By R I Mawby and M L Gill. (Pp. 261; illustrated; £14.50.) London: Associated Book Publishers (UK) Limited, 1987.

**Histopathologie du tube digestif.** By F Potet, J Barge, J F Flejou, and P Zeitoun. (Pp. 324; illustrated; 690F.) Paris: Masson, 1987.

**Gastrointestinal function.** Vol 4. Edited by Y Kasuya, M Tsuchiya, F Nagao and Y Matsuo. (Pp. 167; illustrated, \$72.) International Congress Series, 1986.

**International Congress Series, 1986. Lecture notes on immunology.** By G Reeves. (Pp. 197; illustrated; no price stated.) Oxford: Blackwell Scientific Publications, 1987.

**Clinical tests renal disease.** By P Sweny and Z Varghese. (Pp. 216; illustrated; £15.00.) London, Wolfe Medical Publications Limited, 1987.

**Pathology of the mesothelium.** Edited by J S P Jones. (Pp. 268; illustrated; £93.00.) Berlin: Springer-Verlag, 1987.

## ESSENTIAL READING FROM CHAPMAN AND HALL

### **Blopsy Pathology in Colorectal Disease**

**I C Talbot and A B Price**

This book presents a highly illustrated account of a full range of specific diseases of the colorectum, and will be an invaluable guide to accurate diagnosis.

1987 408 pages Hardback 0 412 22160 8 £48.50

### **Therapeutic Nutrition**

A practical guide

**C R Pennington**

This book describes the source and utilization of nutrients, reviews the nutritional management of disease and gives a great deal of practical advice on the various methods which are available for giving artificial nutritional support in a wide variety of conditions.

March 1988 288 pages, 25 illustrations  
Paperback 0 412 29230 0 £13.95

### **A Colour Atlas of Gastrointestinal Endoscopy**

**K F R Schiller, Roy Cockel and  
Richard H Hunt**

1986 256 pages, illustrated Hardback 0 412 25590 1 £67.50

*Second Edition*

### **Blopsy Pathology of the Liver**

**R S Patrick and J O'D McGee**

Many additions to our knowledge of liver diseases have occurred since the publication of the first edition of this book in 1980. There is now much to add to the descriptions of hepatic histopathology in order that the book may continue to provide an up-to-date account of the subject of value to hospital histopathologists.

July 1988 384 pages Hardback 0 412 29270 8 £49.00

### **Enteric Infection**

Mechanisms, manifestations and management

Edited by **M J G Farthing and G T Keusch**

Infectious diseases are only one of the major conditions which afflict the human gastrointestinal tract. This book with its 35 chapters from international contributors, provides an authoritative and up-to-date account of this important topic.

January 1989 c.544 pages Hardback 0 412 28080 9 c.£50.00

*These books are available from your usual bookshop. In case of difficulty please write to the address below or telephone the Order Department on 0264 332424.*
