CORRECTION

It has come to our attention that there is a dosage error in the print version of the ECCO Consensus on the Management of Crohn's Disease supplement to Gut (March 2006 Volume 55, Supplement I).

The error occurs on page i22 in section 5.4.7. The first line of this section should read:

Methotrexate 25 mg/week (oral, subcutaneous or intramuscular injection, unlicensed therapy for IBD) may be used in a similar fashion to thiopurines.

The online version of this article is correct.

The authors apologise for this error.
