Volume 66 Issue 4 | GUT April 2017

Comentarios
563 Colorectal cancer cells use the negative feedback regulators of WNT signalling to activate epithelial–mesenchymal transition pathways
E Talochinsky

565 A small RNA in neutrophils protects against acute-on-chronic alcoholic liver injury
S Wang, W-X Ding

567 PGAMS: a new player in immune-mediated liver injury
A Ramachandran, H Jaeschke

Guidelines
569 European consensus conference on faecal microbiota transplantation in clinical practice

Stomach
581 Identification of new susceptibility loci for gastric non-cardia adenocarcinoma: pooled results from two Chinese genome-wide association studies

Inflammatory bowel disease
588 Validation of the inflammatory bowel disease Disability Index in a population-based cohort

Gut microbiota
611 The gut microbial profile in patients with primary sclerosing cholangitis is distinct from patients with ulcerative colitis without biliary disease and healthy controls
M Kummer, K Holm, J A Annemark, S Nygård, M Vesterhus, M L Henriksen, T Hjarle, H-U Marischal, E Schmidth, B Moum, H Reis, P Aukrust, T H Karlsen, J R Hov

620 Hepatocyte MyD88 affects bile acids, gut microbiota and metabolome contributing to regulate glucose and lipid metabolism

633 Tumour-associated and non-tumour-associated microbiota in colorectal cancer
B Fiebiger, D B Lynch, J M R Brown, J B Jeffery, F J Ryan, M J Chassion, M O’Riordan, F Chatanat, P W’O Toole

Endoscopy
644 Endoscopic mucosal resection for large serrated lesions in comparison with adenomas: a prospective multicentre study of 2000 lesions
M Pellise, N G Burgess, N Tantia, I F Hourigan, S A Zanati, D J Bourke, R Singh, S J Williams, C Raftopoulos, D Ormonde, A Moss, K Byth, H P’Ng, H Mahajan, D McLeod, J M Bourke

Colon
654 Circulating microRNA-203 predicts prognosis and metastasis in human colorectal cancer
K Har, Y Toyama, Y Okajima, S Ide, H Imazaka, C R Boland, A Gell

Inflammatory bowel disease
597 Raf kinase inhibitor protein mediates intestinal epithelial cell apoptosis and promotes IBDs in humans and mice
W Lin, C Ma, F Su, Y Jiang, R Lai, T Zhang, K Sun, L Fan, Z Cui, Z Li, H Huang, J Li, X Wang
