Figure A: (Left) Relative Angpt3 mRNA expression in Chow_Mboat7<sup>WT</sup> vs. Chow_Mboat7<sup>Δhep</sup> mice. The data is presented as a dot plot with error bars. * indicates a p-value of 0.001.

Figure B: (Right) Serum Angpt3 protein levels in Chow_Mboat7<sup>WT</sup> vs. Chow_Mboat7<sup>Δhep</sup> mice. The data is presented as a dot plot with error bars. ns indicates no significant difference.

Figure C: (Center) Relative gene expression of fatty acid and cholesterol metabolism genes in Chow_Mboat7<sup>WT</sup> vs. Chow_Mboat7<sup>Δhep</sup> mice. The data is presented as a dot plot with error bars. * indicates p-values of 0.05 and 0.01, respectively.
