

Supplementary Figure 3. *L. lactis* inhibits growth of CRC cells. (A, B) Cell viability at OD₅₇₀ of human CRC cells (HCT116, HT29) (A) and normal colon epithelial cells (NCM460) (B) under treatment of direct bacteria culture at different multiplicity of infection. (C, D) Cell viability at OD₅₇₀ of CRC cells (C) and normal cells (D) under treatment of 5% bacterial conditioned medium of different *L. lactis* strains. MOI, multiplicity of infection.
